Description and Pedigree.

Lucifer is a black from gray, 5 years old, with heavy white mane and tail; 15% hands high, and is a horse emineally calculated to produce stock suited to every purpose for which the horse is required. Estag himself beautiful in appearance, of proper size, taultiess in form, mild and geatle in disposition, with action both for harness and saddle rarely equalled, very few, if indeed any, horse in Kentucky of his age can show greater trottling speed in harness, and it has been with great difficulty that he has been restrained from going all the saddle galls, being sired by old Snowstorm, who went one gait as maturally as another, and all with unperallely-disperd and style, and produced more flue asidle and harnesshorses in the two seasons he made in Keatucky than any other horse known. He was of the pare Norman French breed from Canada, and his colts ere commanding wherever found extravagant prices. Lucifer's datu was a large brown mare; blood unknown; was a antural pacer and could, without training, pace her aide in I minutes.

[17] Invite the attentour of breeders to this young borse, at his stand, where I have n good track, end where persons wishing to hreed can have an opportunity of witnessing hisspeed.

THE VESPER GAS. OR AIR LIGHT. The Cheapest, most Hrilliant, and most Convent-

The Cheapest, most Hilliant, and most Conventient Artifletal Light In the World!

If the Vesper Liss Light has won for itself a reputation. It for elegence, economy, safely, and simplicity far beyond any other artificial light. The Vesper Gas flome and fixtures precisely resemble in form those of coal gas; but in brilliancy and purity of light it possosses a decided advantage over even Louisville coel gas. It requires no chimney; there is no need of daily trimining of whek; and the construction of the fixture is so simple that it is not liable to get out of order, and a cidid can manage it readily. The gas burned in the Vesper divitures is generated from pure coal oil, without any admixture of alcohol or other foreign lagredical. It is entirely free from odor while burshing, as, by a simple contrivance, the vapor of the oil is mixed with the atmosphere, producing perfect combustion and a most intense light. The light has been pronounced, by those who have had it in constant use for months, as most pleavant to the eye while reading or sewing, there being no flicker or unsteadiaess. In the flame. The Vesper Gas Light is portable, and can be used in town or country—in fact, wherever artificial light is required. The fixtures themselves are adapted in styles to suit all tastes, from the plain single-light burner to the most coatly chandelier. Each chandeller is perfect in lisely, there is no outlay to be urade for service pipes. The gas is generated in the burner, and all fixtures, from the cheap single-light burner to the expensive chendeller, are talulature gas-works in themselves. They are sold at prices which do not exceed the cost of the ordinary gas fixtures of shuilar style and ornamentsition. A price list will be sent to any address on application. ent Artificial Light in the World!

drd full.

Mr. Reynolds put the Wheel in with the understanding that if it did not grind as much as the Overshot with a same water he was to take it out and charge nothing ac same water he was to take it out and charge nothing or his trouble.

I not satisfied that it will griad one third more to the our than the Overshot Wheel.

I have been acquainted with Mr. Reynolds about six nonths and will guarantee that his Wheels will give more power than he claims for them. I therefore compand from to the public.

Gentlemen: I take pleasure in saying to you that the Water Wheel, (four feet in diameter double Issaed, purchased of Mr. Sminiel Reymolds, the inventor, is now in operation and is giving me entire satisfactou, coming fully up to what it was recommended to do.—My first trial with it was at a very low stage of water, only three and u init feet head. It gave full power, for one run 42 inch Burrs, Boits, Smith Mill, &c., with the glate & open. When the water ruse so as to give me five feet head I have full for two run of Burrs, doing full work, so that under the full head (six feet) I have a surphis of nower.

full work, so that under the full head (six feet) I have a surplus of power.

I have run in backwater to the depth of four feet with no perceivable loss of power. This Wheel is put in place of a thirteen feet diameter Breast Wheel, and gives fully double the power with about the same a mount of water that it did. I therefore take pleasured in paying you for it, believing that I now have u wheel that will last me 20, perhaps 50 years.

Signed, Very truly yours,

Dan. 25, 1760—dattwewsm. W. H. McDONALD.

THIE seal of public approbation has been so multistably fixed upon this Medichie that the proprietor feels it to be his duty to call the intention of nil those persons to it who are suffering from, or who are threatened with, affections of the langs or Throat. Its basis is the active principle of the Wild Cherry Bark, but it contains also, in proper proportions, other of the most efficient pectorals of the MATRIEL MENICA. Its component parts and proportions are well known to physicians every wider, as the proprietor makes no secret of them, and they have met the universal approbation of the faculty, who, as a general thing, prefer using this preparation to any prescription which they can hav prepared by a druggist.

It can be procured from druggists and country stores everywhere. WE warrant our Oils to be equal, if not superior, to any in the market.
